

Split Upper Rotor Housing - Easy acces to the knives

MODELS:

- TP 250 PTO K
- TP 270 PTO K
- TP 280 PTO K
- TP 400 PTO K/TP 400 COMPACT K

The upper rotor housing is split into two parts, and is easy to open with help of an air cylinder

You can open the rotor housing for access to the knives, without having to tip the ejector spout

The ring (flange) on the split rotor housing for mounting the ejector spout is now the same size on all crane chippers, which means, you can use the hydraulic turn for all crane chippers
